

Lineup

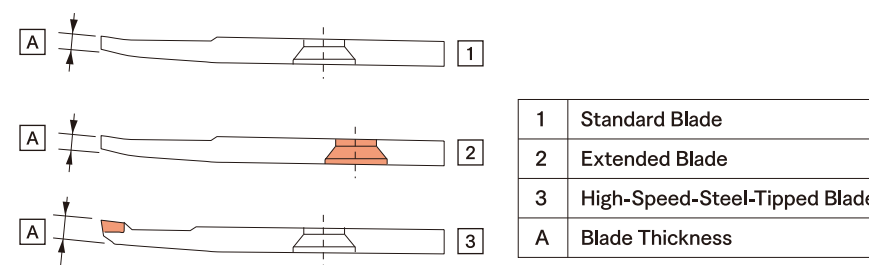

The high-speed-steel-tipped blade is a bedknife that uses a high-speed-steel only on its tip. Thus, it is sharp, durable, and high quality. The standard blade is made of special steel. It is strong and sharp, and offered at a reasonable price.

Type	Blade type	Thickness of blade (mm/inch)	Rough minimum cutting height (mm/inch)	Part name	Remarks
LM18GC (18in)	Standard blade	1.0/0.039	2.5/0.098	BEDKNIFE, TAKUMI 1.0-18	Special blade
		1.5/0.059	3.0/0.118	BEDKNIFE, 1.5-18	
		2.0/0.079	3.5/0.138	BEDKNIFE, 2.0-18	
	Extended blade	1.0/0.039	2.5/0.098	BEDKNIFE, TAKUMI 1.0-18-44.5	Offset 2.5 mm / 0.098 in

5.0/0.197		7.0/0.276	BEDKNIFE, TIPPED 5.0-26		

When the Baroness walk-behind greens mowers are shipped, the bedknife is set in an aggressive stance. This stance allows the machine to grab and cut a large quantity of grass. However, the aggressive mowing increases the risk of scalping depending on the turf condition. In order to reduce the risk of damaging the turf, you can change to a less aggressive setting by switching to the extended bedknife. The extended bedknife comes in different sizes and is available as an option.

Bedknife -TAKUMI-

For Player

What is the best green for a golfer?

One that makes a player calculate his moves carefully and sparks a challenging spirit.

The beauty of the surrounding landscape is also essential.

When at the golf course, the player desires the feeling of time away from daily activities.

Dynamic

Challenging

Beautiful Appearance

Your turf, our goal

A green that satisfies golfers' demands?

Low cut greens significantly increases the speed of the ball. But it requires a careful approach that can never damage the turf. The bedknife TAKUMI makes this work possible.

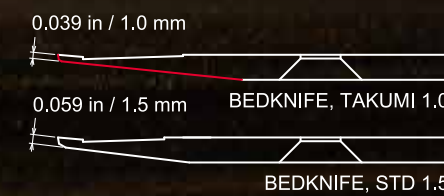

Bedknife -TAKUMI- 匠

Baroness's reel cutter manufacturing technology is one of a kind with the quality of the reel next to none. Now, Baroness is introducing a new series of bedknives -- TAKUMI.

BEDKNIFE, TAKUMI 1.0
Tournament

By shaving the bottom of the bedknife, Baroness designed a thinner bedknife. The clearance between the bottom of the bedknife and the green surface is increased. As a result, stress on the turf is reduced when cutting low.

BEDKNIFE, TAKUMI 1.5
Extended Lifespan

Compared to conventional products, this bedknife's lifespan is longer due to advanced High-Speed-Steel's joining technology. Though thinner, this bedknife can be used for a lot longer and requires less grinding. It can maintain a higher quality of cut for a longer period of time.

Manufacturing

仕

SPEC

The flexible blade is produced utilizing Japanese sword making technology.

考

IDEA

The high-quality and sharp edge produces a beautiful cut while reducing damage to the turf.

製

PRODUCTION

From the material used to the finish of the bedknife, quality is a high priority throughout production. This has resulted in a bedknife that is simple to attach and maintain.

匠

TAKUMI

It is manufactured carefully with no compromise by our experienced craftsmen.

設計

DESIGN

It is designed based on over 50 years of Baroness's own designing experience and expertise on blade making.

材

MATERIAL

The quality of material is selected without compromise. This production policy ensures delivery of quality products to our customers.
